Hi Tom,

I have not looked inside yet but wanted to get these to you ASAP. David's comments.

I carefully read the two more "positive" texts closely, given I expect them to get a great deal of attention.

I did not read the other two, but some of my comments on myeloid leukemia and multiple myeloma might apply to those as well.

The analysis is very good.

I have a number of clarity suggestions. I realize in places the text may be clear to an epidemiologists or to others, but I went ahead and noted wherever it was not totally clear to me.
